

# TANKNET<sup>®</sup> LITE

HANDS-ON TEMPERATURE CONTROL FROM ANYWHERE

*Affordable Fermentation Control for Wineries and Breweries*

## FEATURES:

- *Calibration-Free Temperature Control*
- *Wire-less Tank Thermostats*
- *On-Tank and Remote Control*
- *Real-Time Fermentation Graphs*
- *Alarm Notifications via Cell Phone and E-mail*
- *Chiller Demand Feedback for Energy Savings*
- *Easy Upgrade to TANKNET<sup>®</sup> PROFESSIONAL*

## ACCESS YOUR TANKS FROM ANYWHERE

TANKNET<sup>®</sup> Lite is an extremely affordable temperature control solution designed specifically for small to mid-sized wineries and breweries.

Powered by Acrolon's SmartServer Web-appliance, TANKNET Lite enables winemakers and brewmasters alike to remotely monitor and control their wire-less TANKNET thermostats, view fermentation graphs and receive critical alarm notifications via e-mail or cell phone. The system is also capable of facilitating more energy efficient chiller operation by signaling when one or more tanks is calling for cooling.

TANKNET Lite is remarkably easy to install. The system requires NO network wiring at the tank, NO Windows<sup>®</sup> server and NO software installation of any kind. Exclusive power line networking technology allows the SmartServer to securely and reliably communicate with tank thermostats over existing electrical wires in the cellar.

With its simple installation, intuitive Web/iPhone/Android access and renowned customer support, TANKNET Lite gives winemakers and brewmasters the control they need and the peace of mind they want - at a price they can afford.
